VISION & MISSION

OUR VISION

We strive to be the leading industrial hub in Luzon, celebrated for pioneering world-class architectural solutions and integrating advanced fabrication technologies across porcelain, metal, and specialty systems.

OUR MISSION

We are committed to offering high-precision fabrication services that help architects, contractors, and homeowners reduce project lead times, ensure exceptional quality, and realize their distinctive architectural visions.

BRAND PROFILE

MODERNO

PORCELAIN WORKS

US EXPERTISE

- In collaboration with **Moderno Porcelain Works (USA)**, we are pleased to introduce innovative fabrication techniques to the Philippines. As recognized experts in porcelain, we specialize in large-format porcelain slabs.
- Furthermore, our state-of-the-art facility is equipped for precision cutting and installation of various materials, including Quartz,

ADVANCED MACHINERY

Flow Mach 200 Waterjet Cutting Machine

High-pressure precision cutting for complex shapes and intricate designs.

BotteroVictralux 108FX Edging & Polishing

Flawless mitered edges and seamless joins for a monolithic appearance.

Bottero 353 BKM Score & Snap

Traditional and high-speed precision cutting for rapid deployment.

THE MODERNO ADVANTAGE

Built around speed, clean execution, and material performance.

Unmatched Speed

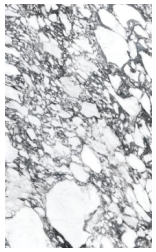

Off-site fabrication and specialized installation crews allow the team to meet aggressive deadlines without sacrificing quality

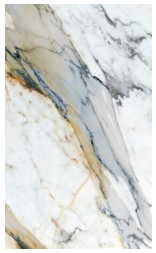

Clean Execution

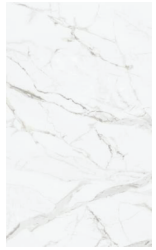

Minimal on-site cutting means less dirt, dust, and noise
Ready-to-install pieces help maintain a tidy site environment.

- Stain Resistant
- Heat Resistant
- Scratch Resistant
- UV Resistant
- Thermal Shock Resistant
- Slip Resistant
- Low Water Absorption
- Vein Match
- Timeless Colors
- Different Textures

01

PROJECT PLANNING

Come to one of our Moderno showrooms to view our full 5'x10' slabs, or let us bring samples to your project site to select the porcelain color. Our specialists perform an in-home consultation to determine the project scope.

02

ENGINEERING

We take precise measurements with 3D laser measuring technology to produce a CAD file that provides a project plan to set accurate expectations. Once approved, this ensures a seamless fabrication and installation process.

03

FABRICATION

Our craftsmen use Moderno's innovative fabrication technology to cut the porcelain slabs to exact specifications of the project plan. Our proprietary assembly method distinguishes Moderno and allows for flawless results.

04

INSTALLATION

Every project is custom and has been checked to the project plan. Our project specialists provide quality assurance with on-site coordination.

05

SATISFACTION

Our team ensures customer satisfaction and provides instructions for caring for your porcelain.

BRAND PROFILE

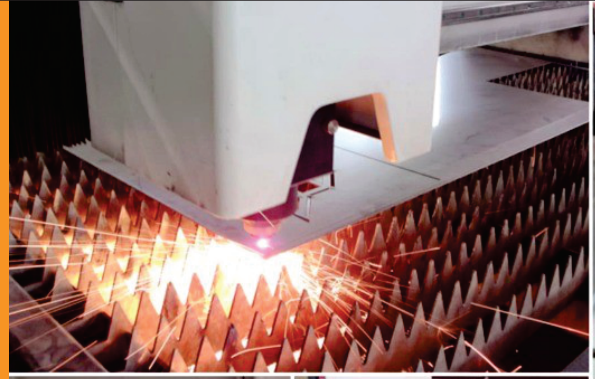

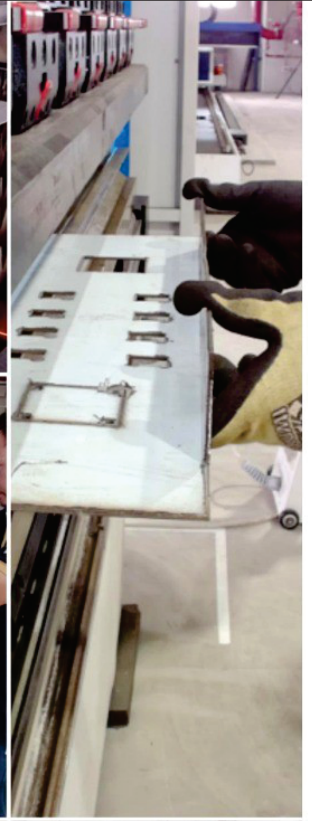

CNC PRECISION

Technical Capabilities

Marigold utilizes a suite of CNC and conventional machines to achievearchitectural precision in Metal, Wood, and Plastic.

- Milling & Lathe Work
- Press Brake & Rolling
- Router & Shear Cutting
- Punching & Notching

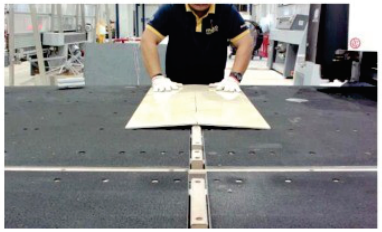

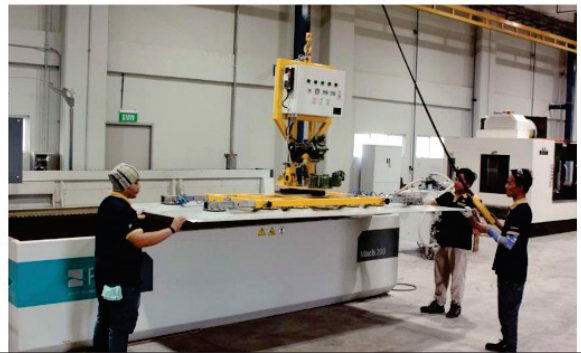

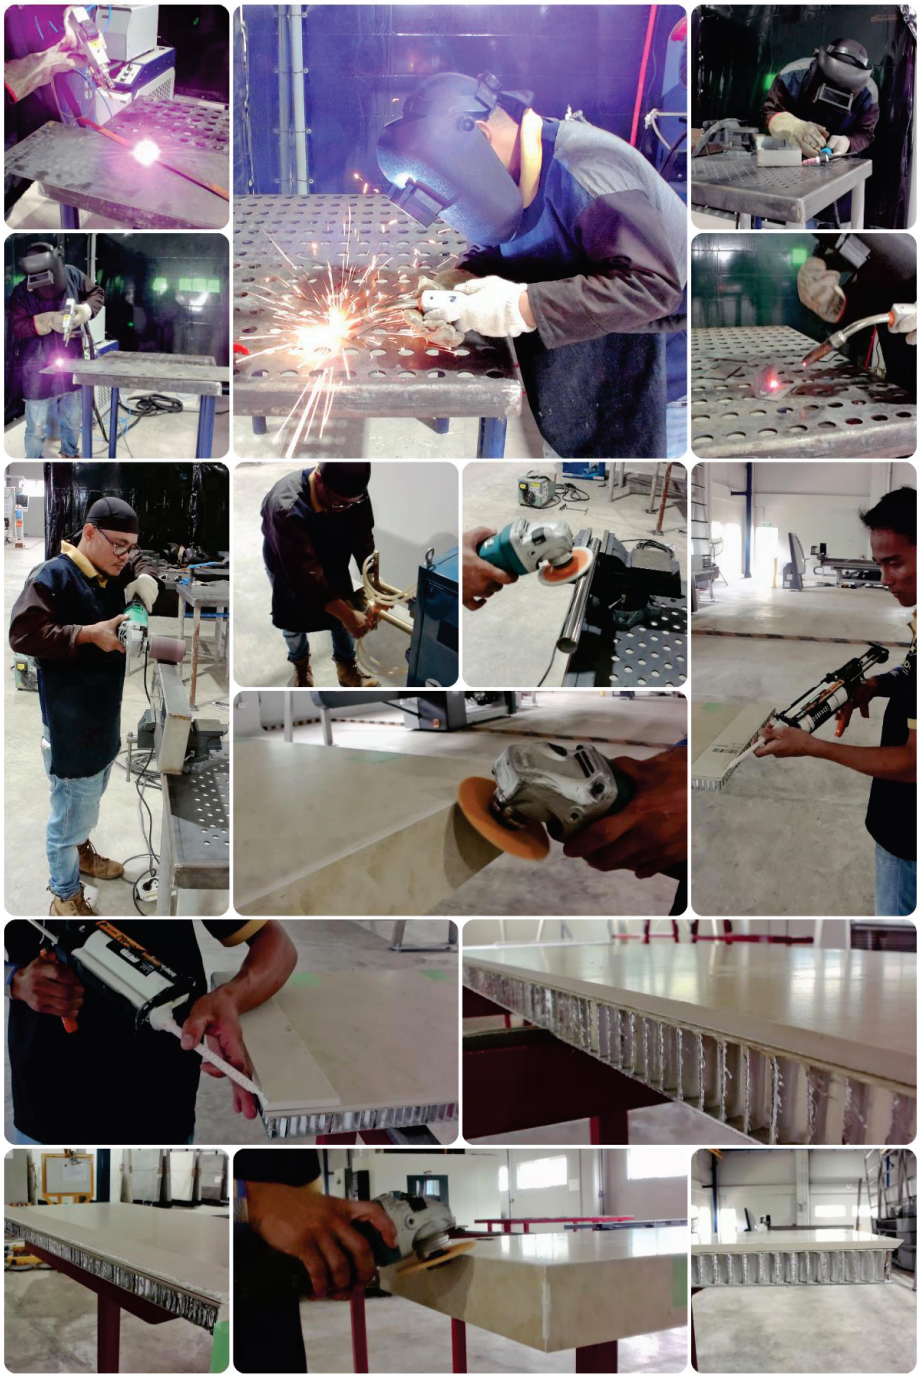

SOPHISTICATED JOINING

Laser Welding
Ultra-precise welding for delicate or high-finish surfaces with minimal heat distortion.

TIG & MIG
Industrial strength welding for structural and architectural metal works.

Assembly Expert
riveting, bolting, and sophisticated plastic welding for multi-material projects.

CUSTOM MILLWORKS

- Architectural Products
- Our facility produces bespoke built-in elements that define high-end spaces:
  - Modular & Stainless Steel Cabinets
  - Custom Shelvings & Partitions
  - Architectural Dividers & Railings
  - Precision Plastic Architectural Elements

"Where precision meets personalization."

BRAND PROFILE

TSUNAMI AQUA SYSTEMS

津　波　ア　ク　ア　シ　ス　テ　ム

AQUATIC EXCELLENCE

Tsunami Aqua System offers high-performance filtration solutions designed specifically for decorative koi ponds and aquatic displays.

Our systems ensure crystal-clear water, enhancing the health and vitality of your aquatic investments through biological and mechanical balance.

COMBI DRUM FILTER

All-In-One Mechanical Hub

The Combi Drum Filter is a Koi Fish-Pond water purification circulation system. Low maintenance cost, equipped with an automatic backwashing function, without additional connection to tap water. Energy-saving with intelligent filtration. Save time, effort, and worry.

- High-Pressure Backwash Nozzle
- Thickened PP Sheet
- Rotary Drum Microfilter
- Aeration Biochemical Bin
- UV Germicidal Lamp

BAKKI FILTER SHOWER

POWERHOUSE BIO-FILTERATION

Inspired by natural waterfalls, the Bakki Shower utilizes a trickle-down method to achieve maximum biological filtration.It consists of a series of trays or shower units that are filled with a specialized filter media.

- Efficient Oxygenation
- Rapid Germiculture
- Large Filtration Layer
- Circulating Filtration
- High Quality PP Material
- Thickened PP Plate
- Wide Outlet
- Nanobacteria House

INTEGRATED DESIGN

Design & Concept

02
Consulatation

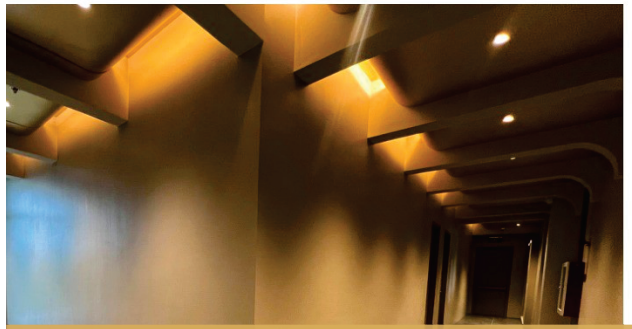

Our Value Added

At Moderno Porcelain Works and Marigold Machining Hub, we engage in more than mere fabrication; we foster collaboration.

Our team offers comprehensive design and consultation services, aimed at assisting architects and designers in optimizing material utilization and enhancing structural integrity prior to the commencement of fabrication.

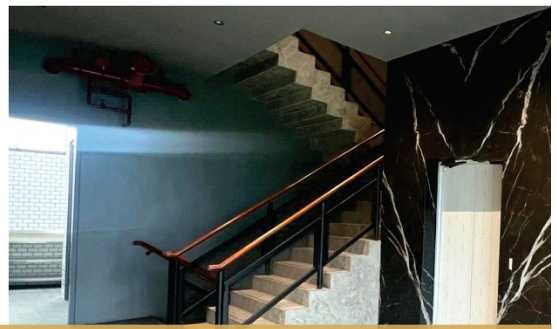

FINISHED PROJECTS

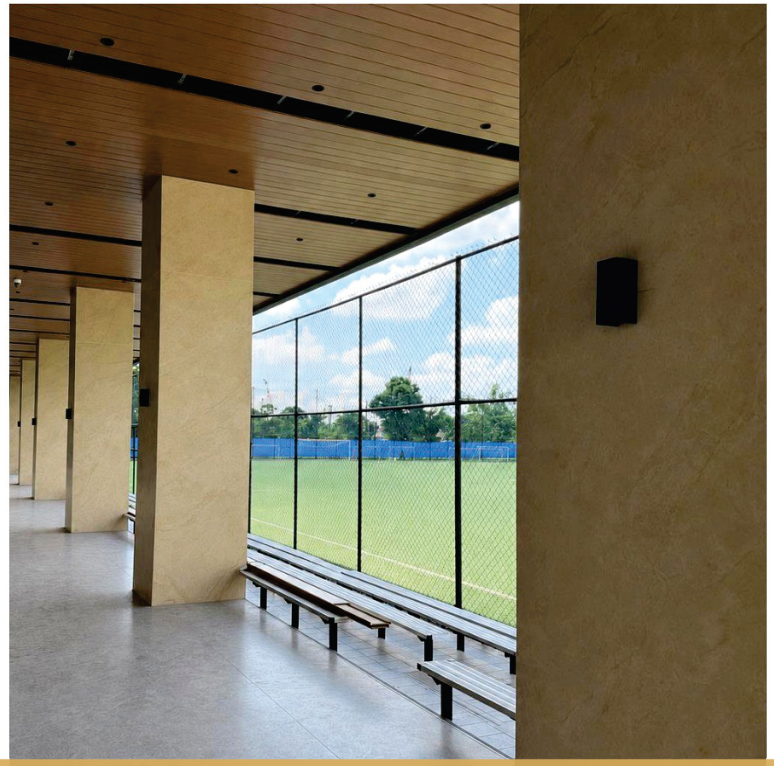

Commercial interiors, ceiling systems, premium wall surfaces, and architectural fit-out works.

FINISHED PROJECTS

Completed applications across interior fit-outs, wood finishes, site installations, and aquatic systems.
